

EFPIA: Supporting adherence

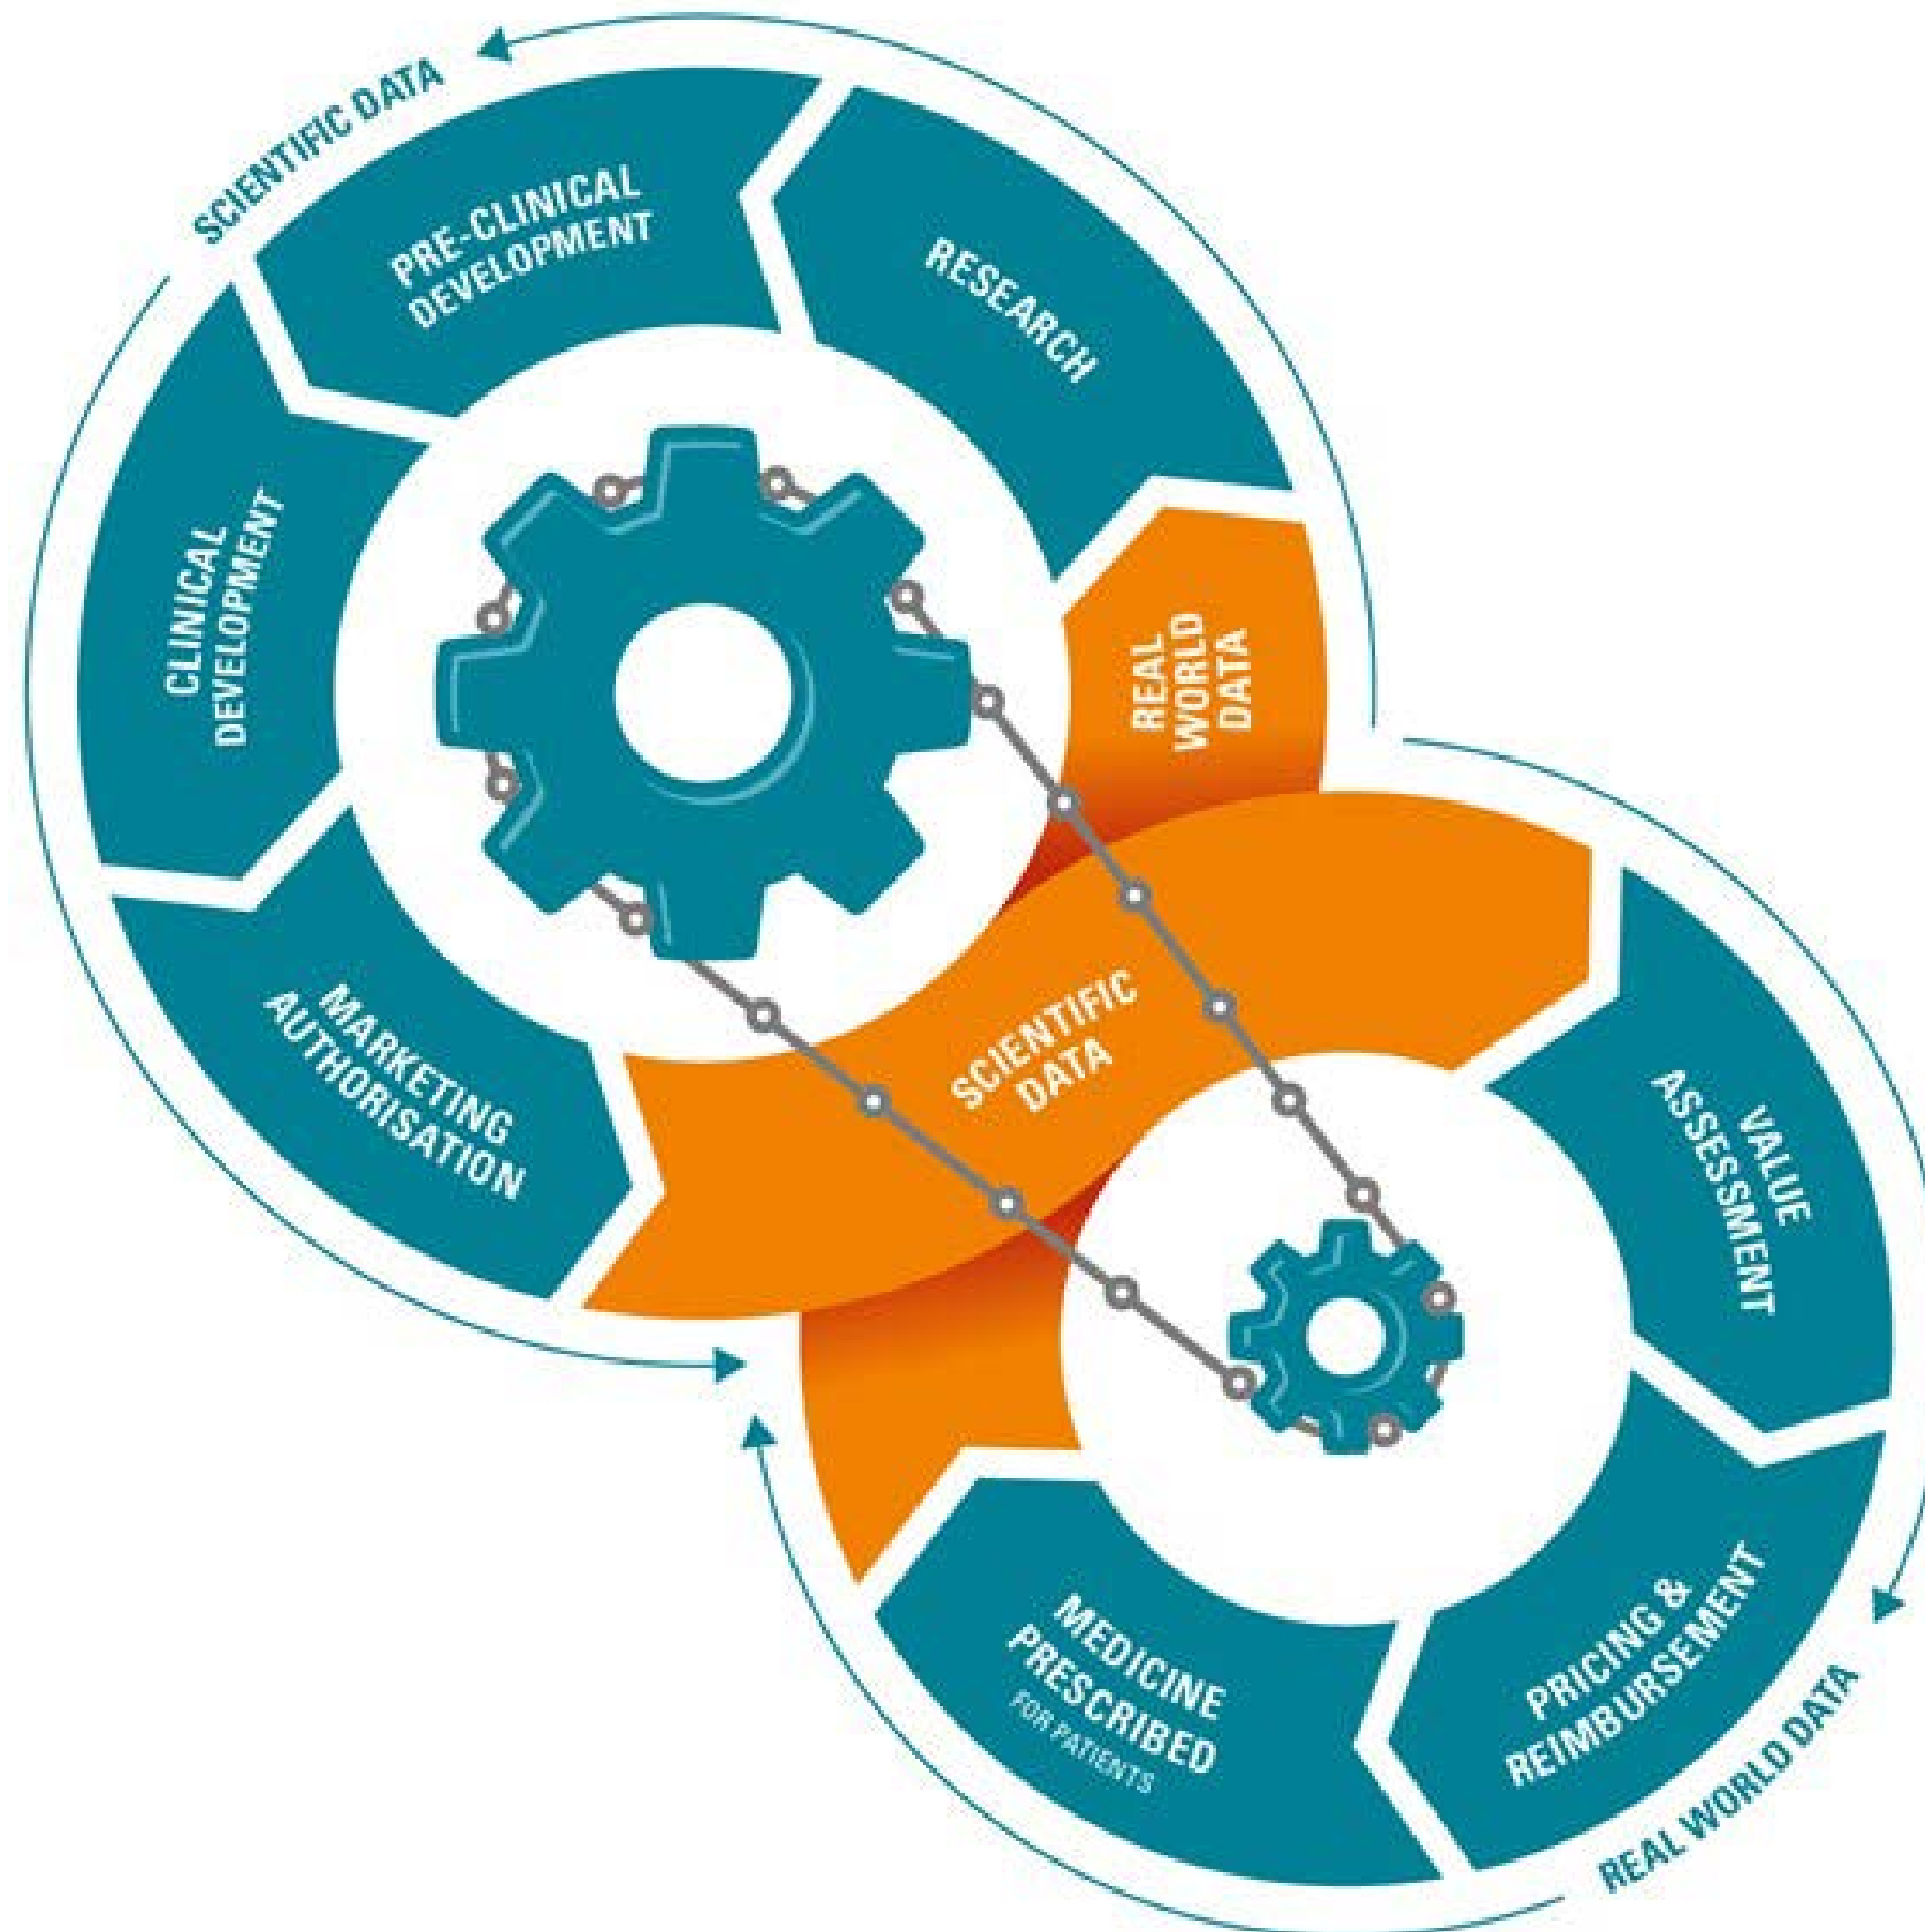

Author: Andrew Powrie-Smith * Date: 23/05/2017 * Version: FINAL

 European Patients
Rights Day

Patient Engagement across the Life cycle

Adherence

- * Patients
- * Companies
- * Healthcare systems

195,400

€564 billion

€125 billion

Trends in healthcare

- * An ageing population
- * Increased levels of chronic disease
- * Increasing co-morbidities
- * Biologics
- * Personalised medicines
- * Poly-pharmacy
- * EHR and data

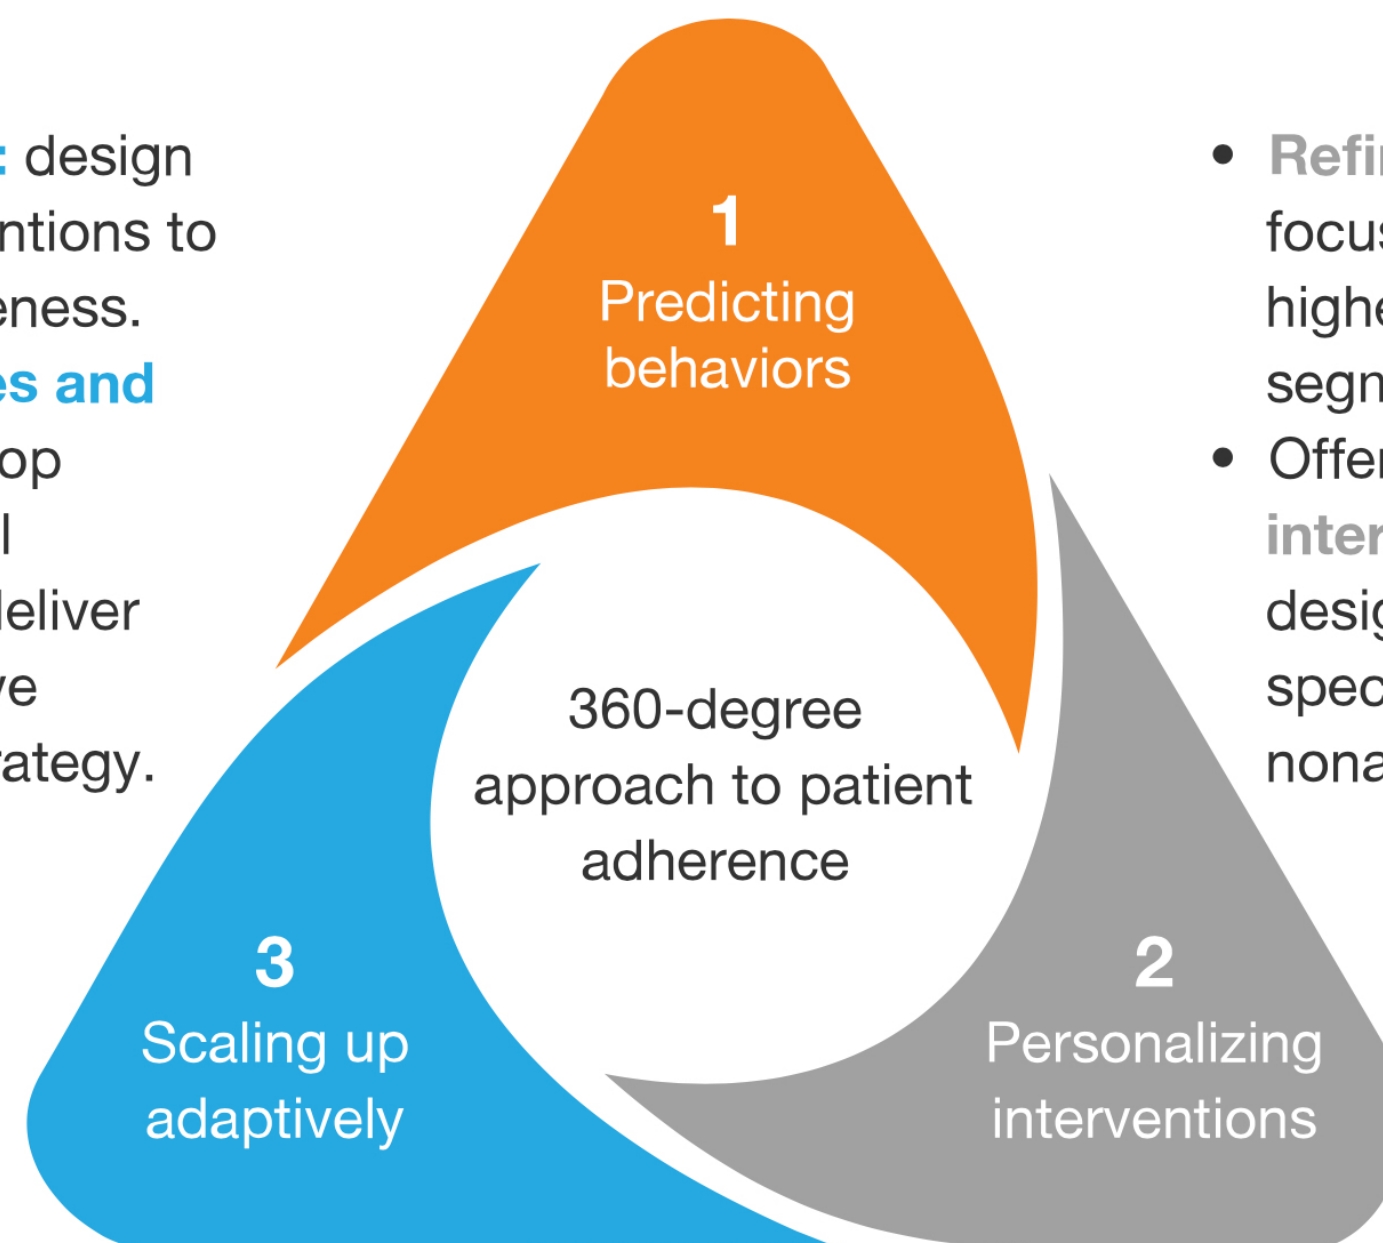

How can we support adherence?

A three-step approach can improve patient adherence.

- Develop **comprehensive view** of patient with real-world data.
- Conduct modeling to identify key **drivers of nonadherence**.
- Apply **predictive analytics** to anticipate adherence behavior.

- **Test and learn:** design and test interventions to assess effectiveness.
- **Agile processes and systems:** develop cross-functional capabilities to deliver a comprehensive engagement strategy.

- **Refine targeting,** focusing on highest-priority segments.
- Offer **personalized interventions** designed for patients' specific drivers of nonadherence.

How can we support adherence?

- * Education
- * Empowerment
- * Economics
- * e-health

How can industry support adherence?

- * Patient engagement through the research and development process
- * Not just what the medicines does but how it is taken
- * There are many examples from diabetes, HIV, respiratory and others

How can industry support adherence?

- * Understand the root causes of non-adherence
- * Support self-management programmes
- * Invest in technical solutions
