

Therapeutic adherence: value the impact for patients and healthcare system

23 May 2018

European Parliament

Alessia Gramuglia, EFN Policy Advisor

NURSES VOICE

EUROPEAN FEDERATION OF NURSES ASSOCIATIONS

TOGETHER

The EFN, representing 3 million nurses in the EU, is the independent voice of the nursing profession and its mission is to strengthen the status and practice of the profession of nursing for the benefit of the health of the citizens and the interest of nurses in the EU and Europe.

WE CAN!

EU Directive 2013/55/EU Art.31 (7) includes in the nurses competence: "Competence to independently advise, instruct and support individuals needing care and their attachment figures"

Coaching roles are key in prevention and disease management

Gender dimension is key to boost prevention and strengthen therapeutic compliance

Digitalisation has a crucial role to support healthcare professionals and patients to ensure therapeutic adherence

Citizen and patient' trust is a central concept in developing digital tools requiring data sharing, therefore, patients and healthcare professionals are central in the data sharing governance. In this context, due to the close relation the nurses develop with the patients and their families, and in their coaching roles, frontline is ideally placed to reinforce the existing trust from citizens towards eHealth solutions.

A concrete engagement of frontline nurses is crucial in the development of digital health solutions to ensure that co-designed health technology supports end-users in leading the transition towards an integrated care model.

Evidence Based Guidelines for Nursing and Social Care on eHealth Services

⇒ **24 partners**

⇒ **120 best practices collected**

⇒ **5 guidelines:**

Prevention – use of mHealth tools

Clinical Practice – eHealth services for COPD

Advanced Roles – Use of eHealth Services by ANP

Integrated Care – continuity of care through eHealth Services

Nurse ePrescribing – Reforming health systems
